

Westbend Distillers

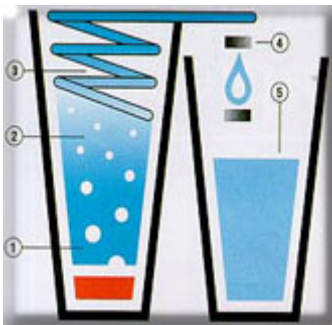

The West Bend Pure Magic Water Distiller virtually pays for itself when compared to bottled water purchases, eliminating the inconvenience of lugging home cumbersome bottles.

Pure steam distilled water produced by the West Bend unit is a fraction of the cost of bottled water.

Optional Accessories/Supplies:

- Stillclean boiler descaler
- Natural coconut shell carbon post filters (6)
- Four litre collector/storage bottle

Operational maintenance and replacement requirements are essential for the products to perform as advertised.

A full range of spare parts and accessories are maintained.

Full service facilities available.

- 1.** Ordinary tap water is heated to 100°C killing bacteria, cysts and viruses that may be present.
- 2.** Steam rises leaving behind dissolved solids, salts, heavy metals and other substances.
- 3.** Steam is condensed in a stainless steel coil.
- 4.** Distilled water then percolates through a coconut shell carbon filter, enhancing quality by adsorption of VOCs.
- 5.** The purified drinking water is collected and stored.

- Contemporary Euro-style design
- Manual fill, no installation required
- Automatic shut-off after each cycle
- Post carbon treatment system
- Removable boiling tank for easy filling
- Stainless steel condenser - not aluminium
- Recessed heating base reduces scale buildup
- External heating element for long life
- Fan-delayed start for improved efficiency
- Space saving dimensions:
 - Width - 24.13cm. Height - 38.10cm.
 - Depth - 40.64cm. Distiller net weight 4.54kg
- Distillate capacity approx. 4 litres in 4.5 hours
- Will provide up to 20 litres in 24 hours
- International 230VAC/50Hz 750W
- UL Listed #28KL
- EST #46050JP01
- USA Patents pending
- All wetted materials rated for FDA & NSF
- 1 Year Warranty – parts & labour
